BIOMETRICAL LETTERS
Polish Biometric Society

About the Journal Editorial For Authors Latest Issues PBS Contact

About the Journal >

Biometrical Letters is the official journal of the Polish Biometric Society, founded in 1964, now published with the financial support of the Ministry of Science and Higher Education. The purpose of Biometrical Letters is publishing papers concerned with different aspects of the analysis and interpretation of results obtained from biometrical experiments, using mathematical and statistical methods. Moreover, the papers presenting statistical and mathematical tools useful in biometry are welcome. Review papers and papers presenting practical use of various methods of data analysis are of special interest. Papers published in Biometrical Letters are indexed in: Current Index to Statistics and Polish Scientific Journal Contents.

Distribution >

Biometrical Letters are distributed to ordinary and sustaining members of the Polish Biometrical Society. Queries concerning the membership (25 Euro including annual subscription) and purchasing the journal should be directed to the secretaries of the Journal.
