### Publication details

## EMCDDA conference proceedings

### Identifying Europe's information needs for effective drug policy

Evidence suggests that early experimentation with psychoactive substances, including alcohol and tobacco, is associated with an increased risk of developing drug problems later in life. In a Selected issue on 'Drug use and related problems among very young people', the EMCDDA focuses on the prevalence and patterns of substance use among the under-15s and on available responses in terms of legislation, prevention and treatment.

**Corporate author(s):** [EMCDDA – European Monitoring Centre for Drugs and Drug Addiction](#)
