About Us

Welcome to the web site of the quarterly Family Medicine & Primary Care Review

The quarterly journal **FAMILY MEDICINE & PRIMARY CARE REVIEW** (formerly: Polska Medycyna Rodzinna) is a peer-reviewed scientific journal open to research workers in family medicine, primary care, and related fields, academic teachers, general practitioners/family doctors, and other primary health care professionals, as well as vocationally trained physicians, residents and medical students. The journal is also meant for those who carry out experimental and epidemiological research in other disciplines. Our mission is to lay the foundations for cooperation and an exchange of ideas, information and experience in family medicine/primary care that could involve all Central and Eastern Europe. This region lacks a journal of the kind. Currently, we are indexed by the EMBASE/Excerpta Medica, the Ministry of Science and Higher Education (with 6 points) and listed in the Index Copernicus (with 6.07 points).
